

SHURJOINT PIPING PRODUCTS

A Shurjoint Group Company

Press Release (Sept. 20, 2005)

Shurjoint 14" and 16" Y-strainers now available.

Dear Shurjoint customers;

We are pleased to announce that we have added 14" and 16" Model 726 grooved-end Y-strainers to our flow control offering. The Model 726 Y-strainers have previously only been available in sizes 2" through 12". Traditional flanged type Y-strainers are very heavy and require a mating flange to be welded on each end of the pipe, which then each require 12 to 16 bolts and nuts to make the flange connection. The grooved-end Model 726 Y-strainer can be installed quickly and easily with two mechanical couplings.

The 726 Y-Strainers feature a stainless steel screen which is secured with an end-cap and a mechanical coupling. Cleaning of the screen can be accomplished easily by removing the few nuts and bolts of the coupling.

For further details, please refer to the submittal No. J-03.

Sincerely,

Howard Hagiya
President
